

# TLB-121F

Dual 15'Subwoofer Weatherproof Line Array Speaker System

# User Manual

# SAFETY INSTRUCTIONS

# PLEASE READ THIS MANUAL FIRST

Thank you for a buying  $\beta_3$  product. Read this manual first as it will help you operate the system properly. Please keep this manual for future reference.

A WARNING: This product must be installed by professionals. When using hanging brackets or rigging other than those supplied with the product, please ensure they comply with the local safety codes.

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED PERSONNEL.

The exclamation point within an equilateral triangle is intended to alert you to the presence of important operating and servicing instructions.

lacksquare ATTENTION: Don't refit the system or spare parts without being authorized as this will void the warranty.

MARNING: Don't place naked flames (such as candles) close to the equipment.

- 1. Read the instruction manual first before using this product.
- 2. Please keep this manual for future reference
- 3. Pay attention to all warnings.
- 4. Obey all operating instructions.
- 5. Do not expose this product to rain or moisture.
- 6. Clean this equipment with a dry cloth.
- 7. Do not block any ventilation openings. Install according to manufacturer's instructions .
- 8. Do not install this product near any heat source, such as a, heater, burner, or any other equipment with heat radiation .
- 9. Only use spare parts supplied by the manufacturer.
- 10. Pay attention to the safety symbol on the outside of the cover.

# TLB-121F

Dual 15 " Subwoofer Weatherproof Line Array Speaker System

# Main Features

- Dual 15 "Sub woofer.
- Long term continuous power: 1800W.
- Frequency response: 40Hz-500Hz (-3dB).
- Sensitivity: 97dB, Max SPL: 122dB/128dB(PEAK) .
- Appropriate hanging frame with shackle for installation.

### Product Description

T-Line Weatherproof Line Array is composed by a dual 12' full range element TLA-121F and a suspend-able dual 15' subwoofer TLB-121F. Compact construction, light weight and quick installation makes the system most suitable for outdoor touring performance applications.

T-Line Weatherproof Line Array Speakers were designed in accordance with IP54 Standard, mainly be applicable for outdoor touring performance.

The adjacent speakers can achieve the seamless coupling and form the consistent cylindrical wave. The adjustable angle between two adjacent speakers is 0°-10°.

Magnetic circuit of LF is optimized through the finite element analysis to achieve the ultra-low distortion and maximum clarity under the high SPL. Overheated protection for drivers, perfect and reliable circuit protection.

TLB-121F adopts multifunctional structure design and Russian birch, weatherproof polyurethane painting provides super strong weather resistance.

### Application

- Religion Place
- Auditorium
- Multi-function hall
- Theater
- All kinds of living performance
- Sports events
- Mobile performance

TLB-121F has two Speakon NL4 socket and amplifier connection. Two parallel connection socket is convenient to connect with another speaker.

#### Installation Reference

1: Hanging

### Installation Accessories

T-Line Weatherproof Line Array is supplied with flying frame TLA-121F frame is welding steel frame, which maximally hangs 16pcs TLA-121F and 4pcs TLB-121F.

Warning: Make sure the mounting accessories safety factor not less than 5:1 or meet the local standard during installation.

#### Frequency response curve & Impedance curve

### Speaker Testing Method

#### 1. Frequency response

Use Pink noise to test the speaker in the anechoic room, adjust the level to make the speaker work at its rated impedance and the power output is 1W, then test the frequency response 1m away from the speaker.

#### 2. Sensitivity

Use full range Pink noise which was modified by EQ curve to test the speaker in the anechoic room, enlarge the signal to make the speaker work at its rated impedance and the power output is 1W, then test the sensitivity 1m away from the speaker.

#### 3. MAX.SPL

Use full range Pink noise which was modified by EQ curve to test the speaker in the anechoic room, enlarge the signal to make the speaker work at its instant power output level, then test the SPL 1m away from the speaker.

#### 4. Rated Power

Use the pink noise according to IEC#268-5 to test the speaker, enlarge the signal for continuous 100hours, the rated Power is the power when the speaker will not incur hot damage or mechanics damage.
